The BWA Basic technology

User-friendly tilting

Manual external cleaning

High pressure pump with ceramic cylinders

Three-dimensional high pressure internal cleaning head

Simple operation

BWA Basic

Mode of operation

The dirty container is tilted onto the cleaning platform with the aid of a special system. Pressing the start button starts the automatic and time-controlled cleaning process.

During the internal cleaning process with a three-dimensional high pressure cleaning head, the outside can be cleaned with a high pressure handheld gun. Cleaning and disinfecting agents can be added as required.

Modular components

- ☒ Tilt system with container holder
- ☒ Cleaning platform with spray nozzle
- ☒ Pump installation with stainless steel housing
- ☒ Splash-protected remote control
