

DS

Disinfection station

For disinfecting

IBC-Containers with drain tap!

Suitable for all standard IBC
with lid opening Ø150 and Ø225.

Disinfection station DS

Your advantage!

- Easy, effortless operation;
- Upgrading of the workplace;
- Highest operational safety;
- optimal disinfectant-water mixture;
- compact and space-saving;

DS

for IBC's up to 1.000 litres

Open the IBC-screw-lid and put the special splash-guard-lid on the IBC-opening.

Connect fresh water and compressed air through GK-coupling, power supply over a 230V outlet.

A conical splash guard lid ensures an optimum hold and is adapted to the standardized openings of IBC's. The built-in fuse protects the employees from not planned operation.

By pressing the start button, the disinfectant-water mixture is pushed through compressed air to the high-quality spray nozzles and the IBC-Container is thoroughly disinfected.
