

MRA 1300

Mobile cleaning system ...

NEW

FEISTMANTL
Cleaning Systems

25 years
1990-2015

FEISTMANTL goes MOBILE

... for perfect cleaning of
2- and 4-wheel containers up to
1.100 liters according to EN 840
and optional Pallet Boxes!

Mobile cleaning system MRA

MRA 1300

- Cleaning of either bins of up to 360 liters or one container from 660 to 1,100 liters
- Internal and external cleaning with three-dimensional cleaning heads
- Equipment like water recycling, disinfection, cleaning agents and automatic discharge systems for solid waste can be chosen individually
- Special lifting and tilting mechanism
- Robust gate, works perfectly automatically
- Container rotation during the cleaning process

Your advantage!

- Highest operational safety
 - Fully automatic cleaning process
 - No water leaks out during or after the cleaning process
- High rentability
 - Staff relief
 - Low water and energy consumption
- Optimal cleaning quality
 - Unique mechanical engineering
- Environmentally friendly
 - Resource efficient,
 - Water recycling

MRA 1300

for containers up to 1.100 litres

Be well prepared for the future with the **MRA 1300** ...

The **MRA 1300** complies **100%** with the requirements of the German Bio Material Directive (§9 **BioStoffVerordnung**).

The unique and **patented process technology** of the BWK 1300 is also used in the MRA 1300 and offers a variety of advantages due to the rotation of the bins/containers during the cleaning process:

- No residue water on lid, bottom and rim areas,
Residual water spreading is avoided when container is tipped out of the cabin
 - Protection for employees (no protective equipment required)
 - Guaranteed clean workplace
- Best cleaning result also in hard to reach areas
- Simultaneous internal and external cleaning in one washing process
- Low water consumption due to 360° rotation
- Quick run times
- Freely selectable washing programs
- Robust and indestructible hydraulic motor
Thus no sensors, cylinders, motors, valves, etc. in the washing area
 - fewer service intervals and wear minimisation
 - offers longer life cycle
